Independent Auditors' Report

To the Board of Directors of NISHOKU TECHNOLOGY INC.:

Opinion

We have audited the financial statements of NISHOKU TECHNOLOGY INC. (“the Company”), which comprise the balance sheet as of December 31, 2025 and 2024, the statement of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the financial statements, including a summary of material policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2025 and 2024, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Key audit matters for the Company's financial statements are stated as follows:

Investments accounted for using equity method

Please refer to Note 4(h) “Investments in subsidiaries” and Note 5 “Significant accounting assumptions and judgments, and major sources of estimation uncertainty” of the financial statements.

Description of key audit matter

The Company's investments accounted for using equity method are all subsidiaries of the Company. Based on the scope and nature of their businesses which may influence the outcome of their operations, the impairment assessment of accounts receivable, and net realizable value of inventories significant subsidiaries required the Managements to make subjective judgments, which is the major source of estimation uncertainty. Therefore, the impairment assessment of accounts receivable, and valuation of inventories of the investments accounted for using equity method are the key audit matters for our audit.

How the matter was addressed in our audit :

Our principal audit procedures on the impairment assessment of accounts receivable of the investments accounted for using equity method included assessing whether the impairment of accounts receivable has been set aside in accordance with the Company's policy, including inquiring from the Management if they had identified the debtors who have financial difficulties ; selecting a moderate number of samples from the account aging statements to ensure the accuracy of the statements, and understanding the reason on overdue accounts; assessing the uncollectable accounts receivable for the appropriateness of impairment assessment of accounts receivable; assessing the appropriateness and adequacy for doubtful accounts made by the management based on the subsequent collection of accounts receivable. With respect to the evaluation of inventories, our principal audit procedures included: to understand whether the accounting policy for inventory evaluation is consistency with the Company; examine the accuracy of the aging of inventories by sampling and analyses the changes of the aging of inventories by comparison; retroactively inspecting the reasonability for allowance provided on inventory valuation in the past and compare it to the current year to ensure that the measurements and assumptions are reasonable; sampling the inventories sold in the subsequent period to assess whether the allowance for inventories are reasonable.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance(including the Audit Committee) are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of the investment in other entities accounted for using the equity method to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Huang, Yung-Hua and Yu, Sheng-Ho.

The Company primarily is involved in the manufacture and sale of plastic injection mold, tooling manufacturing and general import and export Trade.

(2) Approval date and procedures of the financial statements:

These financial statements were authorized for issue by the board of directors on February 26, 2026.

(3) New standards, amendments and interpretations adopted:

- (a) The impact of the IFRS Accounting Standards endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Company has initially adopted the following new amendments, which do not have a significant impact on its financial statements, from January 1, 2025:

- Amendments to IAS21 “Lack of Exchangeability”

- (b) The impact of IFRS Accounting Standards endorsed by the FSC but not yet effective

The Company assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2026, would not have a significant impact on its financial statements:

- IFRS 17 “Insurance Contracts” and amendments to IFRS 17 “Insurance Contracts”
- Amendments to IFRS 9 and IFRS 7 “Amendments to the Classification and Measurement of Financial Instruments”
- Annual Improvements to IFRS Accounting Standards—Volume 11
- Amendments to IFRS 9 and IFRS 7 “Contracts Referencing Nature-dependent Electricity”

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

- (c) The impact of IFRS Accounting Standards issued by IASB but not yet endorsed by the FSC

The following new and amended standards, which may be relevant to the Company, have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

Standards or Interpretations	Content of amendment	Effective date per IASB
IFRS 18 “Presentation and Disclosure in Financial Statements”	<p>The new standard introduces three categories of income and expenses, two income statement subtotals and one single note on management performance measures. The three amendments, combined with enhanced guidance on how to disaggregate information, set the stage for better and more consistent information for users, and will affect all the entities.</p> <ul style="list-style-type: none"> ● A more structured income statement: under current standards, companies use different formats to present their results, making it difficult for investors to compare financial performance across companies. The new standard promotes a more structured income statement, introducing a newly defined ‘operating profit’ subtotal and a requirement for all income and expenses to be allocated between three new distinct categories based on a company’s main business activities. ● Management performance measures (MPMs): the new standard introduces a definition for management performance measures, and requires companies to explain in a single note to the financial statements why the measure provides useful information, how it is calculated and reconcile it to an amount determined under IFRS Accounting Standards. ● Greater disaggregation of information: the new standard includes enhanced guidance on how companies group information in the financial statements. This includes guidance on whether information is included in the primary financial statements or is further disaggregated in the notes. 	January 1, 2027 note: On September 25, 2025, the FSC issued a press release announcing that Taiwan will adopt IFRS 18 beginning in 2028. Entities that need to adopt the new standard earlier may do with the endorsement of the FSC.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

The Company is evaluating the impact on its financial position and financial performance upon the initial adoption of the abovementioned standards or interpretations. The results thereof will be disclosed when the Company completes its evaluation.

The Company does not expect the following other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its financial statements:

- Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture”
- IFRS 19 “Subsidiaries without Public Accountability: Disclosures” and amendments to IFRS 19 “Subsidiaries without Public Accountability: Disclosures”
- Amendments to IAS 21 “Translation to a Hyperinflationary Presentation Currency”

(4) Summary of material accounting policies:

The accompanying financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language financial statements, the Chinese version shall prevail.

The significant accounting policies presented in the financial statements are summarized below. Except for those specifically indicated, the following accounting policies are applied consistently throughout the periods presented in the financial statements.

(a) Statement of compliance

These financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (hereinafter, referred to as “the Regulations”).

(b) Basis of preparation

(i) Basis of measurement

Except for the financial instruments at fair value through profit or loss are measured at fair value, the financial statements have been prepared on a historical cost basis.

(ii) Functional and presentation currency

The functional currency is determined based on the primary economic environment in which the Company operates. The financial statements are presented in New Taiwan dollars, which is the Company’s functional currency. All financial information presented in New Taiwan dollars has been rounded to the nearest thousand.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(c) Foreign currencies

(i) Foreign currency transaction

Transactions in foreign currencies are translated into the respective functional currencies of the Company at the exchange rates at the dates of the transactions. At the end of each subsequent reporting period, monetary items denominated in foreign currencies are translated into the functional currencies using the exchange rate at that date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated into the functional currencies using the exchange rate at the date that the fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of transaction.

(ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into the presentation currency at the exchange rates at the reporting date. The income and expenses of foreign operations are translated into the Company's presentation currency at the average rate. Exchange differences are recognized in other comprehensive income.

When a foreign operation is disposed of such that control, significant influence, or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. When the Company disposes of any part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interest. When the Company disposes of only part of its investment in an associate or a joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to profit or loss.

When the settlement of a monetary receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future. Exchange differences arising from such a monetary item that are considered to form part of the net investment in the foreign operation are recognized in other comprehensive income.

(d) Classification of current and non-current assets and liabilities

The Company classifies the asset as current under one of the following criteria, and all other assets are classified as non-current.

- (i) It is expected to be realized, or intended to be sold or consumed, in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be realized within twelve months after the reporting period; or
- (iv) The asset is cash or a cash equivalent (as defined in IAS 7) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

The Company classifies the liability as current under one of the following criteria, and all other liabilities are classified as non-current.

- (i) It is expected to be settled in the normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is due to be settled within twelve months after the reporting period; or
- (iv) The Company does not have the right at the end of the reporting period to defer settlement of the liability for at least twelve months after the reporting period.

(e) Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits, which meet the above definition and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes, should be recognized as cash equivalents.

(f) Financial instruments

Trade receivables are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

On initial recognition, a financial asset is classified as measured at: amortized cost or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

1) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL :

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Fair value through profit or loss (FVTPL)

All financial assets not classified as amortized cost described as above are measured at FVTPL, including derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

3) Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, ‘principal’ is defined as the fair value of the financial assets on initial recognition. ‘Interest’ is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers :

- contingent events that would change the amount or timing of cash flows ;
- terms that may adjust the contractual coupon rate, including variable rate features ;
- prepayment and extension features ; and
- terms that limit the Company’s claim to cash flows from specified assets (e.g. non-recourse features).

4) Impairment of financial assets

The Company recognizes loss allowances for expected credit losses (ECL) on financial assets measured at amortized cost (including cash and cash equivalents, notes and accounts receivables, other receivables, guarantee deposit paid and other financial assets).

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

The Company measures loss allowances at an amount equal to lifetime expected credit loss (ECL), except for the following which are measured as 12-month ECL:

- debt securities that are determined to have low credit risk at the reporting date ; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables are always measured at an amount equal to lifetime ECL.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 month after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment as well as forward-looking information.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

5) Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognized in its statement of balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

(ii) Financial liabilities and equity instruments

1) Classification of debt or equity

Debt and equity instruments issued by the Company are classified as financial liabilities or equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2) Equity instrument

An equity instrument is any contract that evidences residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued are recognized as the amount of consideration received, less the direct cost of issuing.

3) Other financial liabilities

Financial liabilities are classified as measured at amortized cost, which comprise loans and borrowings, and trade and other payables. Interest expense and foreign exchange gains and losses are recognized in profit or loss, and is included in financial costs under non-operating income or expenses. Any gain or loss on derecognition is also recognized in profit or loss.

4) Derecognition of financial liabilities

The Company derecognizes a financial liability when its contractual obligation are discharged or cancelled, or expired. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value. On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

5) Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

(iii) Derivative financial instruments

The Company holds derivative financial instruments to hedge its foreign currency and interest rate exposures. Embedded derivatives are separated from the host contract and accounted for separately if the host contract is not a financial asset and certain criteria are met.

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognized in profit or loss.

(g) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted-average method and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

(h) Investment in subsidiaries

Investments in subsidiaries are accounted for using the equity method. There is no difference between net income and comprehensive income in the Company's financial statements and net income and comprehensive income attributable to stockholders of the parent. The equity in the Company's financial statements and the equity attributable to stockholders of the parent in the Company's consolidated financial statements are also the same.

Changes in the Company's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

(i) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(ii) Subsequent cost

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

(iii) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

- 1) Buildings: 50 years
- 2) Accessory equipment of buildings: 8~10 years
- 3) Machinery and equipment: 3~8 years
- 4) Office and other equipment: 3~8 years

Depreciation methods, useful lives, and residual values are reviewed at each reporting date and adjusted if appropriate.

(j) Lease

(i) As a lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- there is a change in future lease payments arising from the change in an index or rate; or
- there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee; or
- there is a change in the lease term resulting from a change of its assessment on whether it will exercise an option to purchase the underlying asset, or
- there is a change of its assessment on whether it will exercise a extension or termination option; or
- there is any lease modifications

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Company accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Company presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(k) Impairment of non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount. Impairment losses are recognized in profit or loss. They are allocated to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(l) Revenue from contracts with customers

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring goods to a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Company's main types of revenue are explained below.

(i) Sale of goods

The Company manufactures and sells plastic goods and molds. The Company recognizes revenue when control of the products has transferred, a point in time when the products are delivered to the customer, the customer has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

A receivable is recognized when the goods are delivered, since this is the point in time when the Company has a right to receive an amount of consideration unconditionally.

(ii) Financing components

The Company does not expect to have any contracts which the period between the transfer of the promised goods to the customer and payment by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money.

(m) Employee benefits

(i) Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(ii) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

(n) Share-based payment

The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognized as employee expenses, with a corresponding increase in equity, over the vesting period that the employees become unconditionally entitled to the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognized is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

For share-based payment awards with non-vesting conditions, the grant-date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

Grant date of a share-based payment award is the date which the board of directors authorized the price and number of a new award.

(o) Income taxes

Income taxes comprise current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes shall be recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to the temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes are recognized except for the following:

- (i) temporary differences on the initial recognition of assets and liabilities in a transaction that is not a business combination and at the time of the transaction (i) affects neither accounting nor taxable profits (losses) and (ii) does not give rise to equal taxable and deductible temporary differences;
- (ii) temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- (iii) taxable temporary differences arising on the initial recognition of goodwill.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

Deferred tax assets are recognized for the carry forward of unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax asset are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized; such reductions are reversed when the probability of future taxable profits improves.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reserve, using tax rates enacted or substantively enacted at the reporting date.

Deferred tax assets and liabilities are offset if the following criteria are met:

- (i) the Company has a legally enforceable right to set off current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
 - 1) the same taxable entity; or
 - 2) different taxable entities which intend to settle current tax assets and liabilities on a net basis, or to realize the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

(p) Earnings per share

The Company discloses the basic and diluted earnings per share attributable to ordinary shareholders of the Company. The calculation of basic earnings per share is the profit attributable to the ordinary shareholders of the Company divided by the weighted-average number of ordinary shares outstanding. The calculation of diluted earnings per share is the profit attributable to ordinary shareholders of the Company dividend by the weighted-average number of ordinary shares outstanding after adjustment for the effects of all dilutive potential ordinary shares. Dilutive potential ordinary shares comprise employee remuneration, employee stock options, and restricted employee stock.

(q) Operating segments

Please refer to Company's consolidated financial statements for the years ended December 31, 2025 and 2024, for further details.

(5) Significant accounting assumptions and judgments, and major sources of estimation uncertainty:

The preparation of the financial statements in conformity with the IFRSs endorsed by the FSC requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The management continues to monitor the accounting estimates and assumptions. The management recognizes any changes in accounting estimates during the period and the impact of those changes in accounting estimates in the following period.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

There are no critical judgment made in applying the accounting policies that have significant effects on amounts recognized in financial statements.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment with the following year is as follows:

- (a) The loss allowance of accounts receivable of subsidiaries accounted for using equity method

The Group has estimated the loss allowance of trade receivable that is based on the risk of a default occurring and the rate of expected credit loss. The Group has considered historical experience, current economic conditions and forward-looking information at the reporting date to determine the assumptions to be used in calculating the impairments and the selected inputs.

- (b) Valuation of inventories of subsidiaries accounted for using equity method

As inventories are stated at the lower of cost or net realizable value, the Group estimates the net realizable value of inventories for obsolescence and unmarketable items at the end of the reporting period and then writes down the cost of inventories to net realizable value. The net realizable value of the inventory is mainly determined based on assumptions as to future demand within a specific time horizon. Due to the rapid industrial transformation, there may be changes in the net realizable value of inventories.

The Company's accounting policies include measuring financial and non-financial assets and liabilities at fair value through profit or loss. The Company has established an internal control framework with respect to the measurement of fair value and regularly reviews significant unobservable inputs and valuation adjustments. If third-party information, such as broker quotes or pricing services, is used to measure fair value, then the Company will assess the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRSs, including the level in the fair value hierarchy in which such valuations should be classified.

The Company strives to use market observable inputs when measuring assets and liabilities. Different levels of the fair value hierarchy to be used in determining the fair value of financial instruments are as follows:

- (a) Level 1: quoted prices (unadjusted) in active markets for identifiable assets or liabilities.
- (b) Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- (c) Level 3: inputs for the assets or liability that are not based on observable market data.

For any transfer within the fair value hierarchy, the impact of the transfer is recognized on the reporting date. Please refer to note 6(u) for assumptions used in measuring fair value.

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(6) Explanation of significant accounts:

(a) Cash and cash equivalents

	<u>December 31,</u> <u>2025</u>	<u>December 31,</u> <u>2024</u>
Cash and demand deposits	\$ 202,403	195,581
Time deposits	565,740	-
Bond acquired under repurchase agreement	<u>232,865</u>	<u>131,140</u>
Cash and cash equivalents in the statement of cash flows	<u><u>\$ 1,001,008</u></u>	<u><u>326,721</u></u>

(ii) Please refer to note 6(u) for credit risk and market risk.

(iii) As of December 31, 2025 and 2024, the Company did not provide any financial assets as collateral for its loans.

(c) Accounts receivable (including related parties)

	<u>December 31,</u> <u>2025</u>	<u>December 31,</u> <u>2024</u>
Accounts receivable (including related parties)	\$ 258,189	340,558
Less : Loss allowance	<u>(8)</u>	<u>-</u>
	<u><u>\$ 258,181</u></u>	<u><u>340,558</u></u>

The Company applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information. The loss allowance provisions were determined as follows:

Notes to the Financial Statements

(e) Non-current financial assets at amortized cost

	December 31, 2025	December 31, 2024
Restricted bank deposit-current	\$ 547,385	454,794
Bonds	30,863	-
	\$ 578,248	454,794
	December 31, 2025	December 31, 2024
Restricted bank deposit-non-current	\$ 713,119	1,257,962
Bonds	-	64,944
	\$ 713,119	1,322,906

In June 2021, May and July 2020, the Company applied to the IRS for the application of “The Management, Utilization, and Taxation of Repatriated Offshore Funds Act” (hereinafter referred to as the “Act”), which was approved; and thereafter, its overseas funds had been remitted to Taiwan within one month based on the Act. According to the Act, the funds need to be deposited in a special-purpose account for five years, in which 5% of the funds can be used without restriction, 25% can be used on financial investment, and a minimum of 70% can be used for substantive investment. In the 6th year, the funds can only be redeemed within 3 consecutive years. For funds used on financial investment, please refer to note 6(b) “Fund investments noncurrent”.

The Company assessed that these corporate bonds held until maturity to collect contractual cash flows, which are solely for the payment of the principal and interest of the outstanding principal, shall be presented as financial assets at amortized cost.

As of December 31, 2025 and 2024, the Company did not provide any financial assets as collateral.

(f) Investments accounted for using equity method

A summary of the Company’s financial information for investments accounted for using the equity method at the reporting date is as follows:

	December 31, 2025	December 31, 2024
Subsidiaries	\$ 5,236,753	4,852,756

(i) Subsidiaries

Please refer to the Company’s consolidated financial statements for the year ended December 31, 2025, for details of subsidiaries.

(ii) As of December 31, 2025 and 2024, the Company did not provide any investments accounted for using the equity method as collateral for its loans.

(v) The Company income tax returns have been examined by the tax authority through the years up to 2023.

(n) Capital and other equity

As of December 31, 2025 and 2024, the total value of authorized ordinary shares each amounted to \$1,500,000 thousand, of which, 150,000 thousands shares, with par value of \$10 per share, at the amount of \$20,000 thousand, were reserved as employee stock options. Thereafter, 63,022 thousand ordinary shares were issued and paid upon issuance. All related registration procedures for both periods had been completed as of the reporting dates.

The issued and registered shares of common stock in 2025 and 2024 were as follows (expressed in thousands of shares)

	<u>Ordinary shares</u>	
	<u>2025</u>	<u>2024</u>
Balance on January 1	63,022	63,040
Retirement of restricted employee stock	<u>-</u>	<u>(18)</u>
Balance on December 31	<u>63,022</u>	<u>63,022</u>

(i) Issuance of common stock

In addition, during the fourth quarter of 2024, the Company reclaimed 18 thousand unvested employee restricted shares, which were cancelled by a resolution of the Board of Directors on November 1, 2024. All relevant registration procedures have been completed.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(ii) Capital surplus

The balances of capital surplus as of December 31, 2025 and 2024, were as follows:

	<u>December 31,</u> <u>2025</u>	<u>December 31,</u> <u>2024</u>
Share capital	\$ 924,338	918,669
Employee share options	10,892	10,892
Restricted employee stock	<u>5,669</u>	<u>11,338</u>
	<u><u>\$ 940,899</u></u>	<u><u>940,899</u></u>

According to the ROC Company Act, capital surplus can only be used to offset a deficit, and only the realized capital surplus can be used to increase the common stock or be distributed as cash dividends. The aforementioned realized capital surplus includes capital surplus resulting from premium on issuance of capital stock and earnings from donated assets received. According to the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, capital increases by transferring paid-in capital in excess of par value should not exceed 10% of the total common stock outstanding.

The Company distributed capital surplus allocated to common stock owners according to the distribution plan via the special resolution meeting of the board of directors held on April 26, 2024.

	<u>2023</u>	
	<u>Per share</u> <u>(dollars)</u>	<u>Amount</u>
capital surplus allocated to common stock owners	<u><u>\$ 0.5</u></u>	<u><u>31,520</u></u>

(iii) Retained earnings

The Company's article of incorporation stipulate that, when allocating the profit for each fiscal year, the Company shall first offset its losses in previous years. Of the remaining profit, 10% is to be appropriated as legal reserve, until the accumulated legal reserve equals the Company's paid-in capital. Aside from the aforesaid legal reserve, the Company shall appropriate or reverse another sum as special earnings reserve in accordance with relevant laws or regulations or requested by the authorities in charge. The remaining profit together with any undistributed retained earnings shall be distributed according to the distribution plan proposed by the Board of Directors and submitted to the stockholders' meeting for approval.

According to the amendment of the of Article 240 and Article 241 of the ROC Company Act, the Company authorized the distributable dividends and bonuses in whole or in part may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the Board of Directors attended by two-thirds of the total number of directors; and in addition thereto a report of such distribution shall be submitted to the shareholders' meeting.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

Before the distribution of dividends, the Company shall first take into consideration its operating environment, industry developments, and the long-term interests of stockholders, as well as its programs to maintain operating efficiency and meet its capital expenditure budget and financial goals in determining the stock or cash dividends to be paid. The dividend to be distributed shall be no less than 10% of the current-year retained earnings available for distribution only if the current-year retained earnings available for distribution does not reach \$0.5 per share, the Company may decide not to distribute dividend. The dividend to be distributed may be in the form of cash and stock, and cash dividend in the distribution shall not be less than 30%.

1) Legal reserve

According to the amendment of the ROC Company Act, the Company must retain 10% of its after-tax annual earnings as legal reserve until such retention equals the amount of total capital. When a company incurs no loss, it may, pursuant to a resolution by a shareholders' meeting, distribute its legal reserve by issuing new shares or by distributing cash, and only the portion of legal reserve which exceeds 25% of capital may be distributed.

2) Special reserve

In accordance with Ruling No. 1010012865 issued by the FSC on April 6, 2012, a portion of current-period earnings and undistributed prior-period earnings shall be set aside as special earnings reserve during earnings distribution. The amount to be set aside should equal the current-period total net reduction of other shareholders' equity. Similarly, a portion of undistributed prior-period earnings shall be set aside as special earnings reserve (and can not be distributed) to account for cumulative changes to other shareholders' equity pertaining to prior periods. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions. As of December 31, 2025, special earnings reserve amounted to \$198,317 thousand.

3) Earnings distribution

Earnings distribution for 2024 and 2023 were decided via the special resolution of the board of directors held on February 27, 2025, and April 26, 2024, respectively. The relevant dividend distributions to shareholders were as follows:

	2024		2023	
	Payout per share	Amount	Payout per share	Amount
Dividend to shareholders				
Cash	\$ 10.0	630,222	7.0	441,282

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

Earnings distribution for 2025 were decided via the special resolution of the board of directors held on February 26, 2026. The relevant dividend distributions to shareholders were as follows:

	2025 (Proposed)	
	Payout per share	Amount
Dividend to shareholders		
Cash	\$ 9.0	567,200

(o) Share-based payment

(i) Restricted stock

A resolution had been decided during the shareholders' meeting held on June 15, 2022 for the Company to issue a maximum of 400 thousand restricted stocks to its qualified fulltime employees, with the approval of the Financial Supervisory Commission as follows:

	Restricted stock for Employees 2022-1	Restricted stock for Employees 2022-2
Grant date	August 3, 2022	July 5, 2023
Fair value (per share)(in dollars)	72.8	84.7
Exercise price (in dollars)	0	0
Granted units (thousand shares)	372	24
Vesting period	2-4 years	2-4 years

The restricted stock is kept by a trust, which is appointed by the Company, before it is vested. These shares shall not be sold, pledged, transferred, gifted, or by any other means, disposed of the third parties during the custodian period. The voting rights of these shares are executed by the custodian, and the custodian will act based on law and regulations. If the shares remain unvested after the vesting period, the Group will cancel the unvested shares thereafter.

The related information on restricted stock of the Group was as follows:

	2025	2024
Outstanding at beginning of period	176	364
Vested during the period	(88)	(170)
Forfeited during the period	-	(18)
Outstanding at end of period	88	176

(ii) Expenses attributable to share-based payments were as follows:

	2025	2024
Restricted stock for employees	\$ 2,150	8,024

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(p) Earnings per share

(i) Basic earnings per share

The calculation of basic earnings per share for the years ended December 31, 2025 and 2024, was based on the profit attributable to ordinary shareholders of the Company and the weighted-average number of ordinary shares outstanding, calculated as follows:

	<u>2025</u>	<u>2024</u>
Profit attributable to ordinary shareholders of the Company	\$ <u>615,304</u>	<u>869,119</u>
Weighted-average number of ordinary shares (thousand shares)	<u>62,883</u>	<u>62,745</u>
Basic earnings per share	\$ <u>9.78</u>	<u>13.85</u>

(ii) Diluted earnings per share

The calculation of diluted earnings per share for the years ended December 31, 2025 and 2024, were based on the profit attributable to the ordinary shareholders of the Company and the weighted-average number of ordinary shares outstanding after adjustment for the effects of all dilutive potential ordinary shares, calculated as follows:

	<u>2025</u>	<u>2024</u>
Profit attributable to ordinary shareholders of the Company (diluted)	\$ <u>615,304</u>	<u>869,119</u>
Weighted-average number of ordinary shares (diluted) (thousand shares)		
	<u>2025</u>	<u>2024</u>
Weighted-average number of ordinary shares (basic)	62,883	62,745
Effect of employee stock bonuses	267	261
Effect of restricted stock	<u>79</u>	<u>152</u>
Weighted-average number of ordinary shares (diluted)	<u>63,229</u>	<u>63,158</u>
Diluted earnings per share	\$ <u>9.73</u>	<u>13.76</u>

(q) Revenue from contracts with customers

(i) Details of revenue

	<u>2025</u>	<u>2024</u>

	December 31, 2025	December 31, 2024	January 1, 2024
Contract liabilities	\$ 7,205	11,633	9,030

For details on accounts receivable, please refer to note 6 (c).

The major change in the balance of contract liabilities is the advance consideration received from customers for the contracts, in which revenue is recognized when products are delivered to customers. The amount of revenue recognized for the years ended December 31, 2025 and 2024, which was included in the contract liability balance at the beginning of the period, was \$9,103 thousand and \$4,994 thousand, respectively.

(r) Employee, board of directors' compensation

On May 29, 2025, the Company resolved at its shareholders' meeting to amend its Articles of Incorporation. Under the revised articles, if the Company incurs profit for the year, the profit should first be used to offset against any accumulated deficits. Thereafter, a minimum of 1% of the remainder (in form of stock or cash), shall be appropriated as employee remuneration (of which, a minimum of 20% shall be reserved specifically for non-executive employees); recipients may include employees of the Company's subsidiaries who meet certain requirements. Moreover, a maximum of 5% of the remaining profit shall be appropriated as directors' remuneration.

Under the Articles of Incorporation prior to the amendment, if the Company incurs profit for the year, the profit should first be used to offset against any accumulated deficits. Thereafter, a minimum of 1% of the remainder (in form of stock or cash), shall be appropriated as employee remuneration; recipients may include employees of the Company's subsidiaries who meet certain requirements. Moreover, a maximum of 5% of the remaining profit shall be appropriated as directors' remuneration.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

For the years ended December 31, 2025 and 2024, the Company accrued and recognized its employee remunerations amounting to \$27,000 thousand and \$30,000 thousand, respectively; as well as its remunerations to directors amounting to \$10,200 thousand and \$12,075 thousand, respectively. These amounts were calculated by using the Company's pre-tax net profit for the period before deducting the amounts of the remunerations to employees, directors, multiplied by the distribution of ratio of the remunerations to employees, and directors based on the Company's articles of incorporation, and expensed under operating costs or expenses. If there would be any changes after the reporting date, the changes shall be accounted for as changes in accounting estimates and recognized as profit or lost in the next year. If, however, the shareholders determine that the employee remuneration is to be distributed through stock dividends, the calculation, based on the shares, shall be calculated using the stock price on the day before the shareholders' meeting.

There were no significant difference between the estimated and actual amounts in 2025 and 2024.

The related information can be accessed from the Market Observation Post System website.

(s) Other revenue

	<u>2025</u>	<u>2024</u>
Interest income	\$ 88,364	116,219
Others	<u>126</u>	<u>78</u>
	<u><u>\$ 88,490</u></u>	<u><u>116,297</u></u>

(t) Other gains and losses

The other gains and losses for the years ended December 31, 2025 and 2024 were as follows:

	<u>2025</u>	<u>2024</u>
Foreign exchange gains (losses)	\$ (102,017)	145,693
Gains on financial assets at fair value through profit or loss	7,388	25,916
Gains on disposal of property, plant and equipment, net	66	3
Others	<u>(440)</u>	<u>-</u>
	<u><u>\$ (95,003)</u></u>	<u><u>171,612</u></u>

(u) Financial Instruments

(i) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, which arises from the Company's accounts receivable and investments.

1) Accounts receivable and others receivables

For credit risk exposure of note and accounts receivables, please refer to note 6(c).

The Company has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. The Company's review includes external ratings, when available, and in some cases bank references. These criterias are reviewed periodically.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

2) Investment

The credit risk exposure in bank deposits, fixed-income investment, and other financial instruments is measured and monitored by the Company's finance department. As the Company deals with banks and other external parties with good credit standing and with financial institutions, corporate organizations, and government agencies which are graded above investment level, the management believes their counterparts do not have significant default risk, therefore, the credit risk is insignificant.

3) Credit risk exposure

As of December 31, 2025 and 2024, the Company's maximum exposure to credit risk was mainly from the carrying amount of financial assets recognized in the statements of financial position and amounted to \$2,925,572 thousand and \$2,871,722 thousand, respectively. The Company had deposited these bank deposits in different financial institutions, and the Company believes that there is no significant credit risk from the above mentioned financial institutions.

4) Concentration of credit risk

The credit risk exposure of the Company comes from the credit of individual customers, and the industry of the customer also have effect on credit risk. For the years ended December 31, 2025 and 2024, sales to the individual customers whose revenue constituting over 10% of net revenue are 71% and 89% of total revenues respectively. As of December 31, 2025 and 2024, 62% and 86%, of accounts receivable were for those customers, respectively.

(ii) Liquidity risk

The following table shows the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements.

	<u>Carrying amount</u>	<u>Contractual cash flows</u>	<u>within 1 year</u>	<u>1-2 years</u>	<u>2-5 years</u>
December 31, 2025					
Non-derivative financial liabilities					
Short-term borrowings	\$ 1,400,000	1,403,113	1,403,113	-	-
Long-term borrowings	1,000,000	1,036,449	19,000	664,327	353,122
Non-interest bearing liabilities					
Notes and accounts payable (including related parties)	133,246	133,246	133,246	-	-
Lease liabilities	5,799	5,799	3,417	2,382	-
Other financial liabilities	10,565	10,565	10,565	-	-
	<u>\$ 2,549,610</u>	<u>2,589,172</u>	<u>1,569,341</u>	<u>666,709</u>	<u>353,122</u>

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

	<u>Carrying amount</u>	<u>Contractual cash flows</u>	<u>within 1 year</u>	<u>1-2 years</u>	<u>2-5 years</u>
December 31, 2024					
Non-derivative financial liabilities					
Short-term borrowings	\$ 1,085,000	1,086,998	1,086,998	-	-
Long-term borrowings	800,000	820,843	15,864	804,979	-
Non-interest bearing liabilities					
Notes and accounts payable (including related parties)	219,277	219,277	219,277	-	-
Lease liabilities	9,154	9,154	3,355	5,799	-
Other financial liabilities	9,842	9,842	9,842	-	-
	<u>\$ 2,123,273</u>	<u>2,146,114</u>	<u>1,335,336</u>	<u>810,778</u>	<u>-</u>

The Company does not expect that the cash flows included in the maturity analysis could occur significantly earlier or at significantly different amounts.

(iii) Market risk

1) Exchange rate risk

The Company's significant exposure to foreign currency risk on financial assets and liabilities was as follows:

	<u>December 31, 2025</u>			<u>December 31, 2024</u>		
	<u>Foreign currency</u>	<u>Exchange rate</u>	<u>NTD</u>	<u>Foreign currency</u>	<u>Exchange rate</u>	<u>NTD</u>
<u>Financial assets</u>						
<u>Monetary Items</u>						
USD	\$ 79,549	31.430	2,500,214	76,274	32.785	2,500,642
JPY	338,638	0.2008	67,998	408,567	0.2099	85,758
EUR	617	36.900	22,769	573	34.140	19,578
<u>Financial liabilities</u>						
<u>Monetary Items</u>						
USD	3,265	31.430	102,625	6,050	32.785	198,343
JPY	-	0.2008	-	4,030	0.2099	846
EUR	49	36.9000	1,799	-	34.14	-

The Company's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, accounts receivable, accounts payable and other payables that are denominated in foreign currency.

A weakening (strengthening) of 1% of the NTD against the USD, JPY and EUR at December 31, 2025 and 2024, would have increased or decreased the net profit before tax by \$24,866 thousand and \$24,068 thousand, respectively. The analysis assumes that all other variables remain constant and ignores any impact of forecasted sales and purchases. The analysis is performed on the same basis for both periods.

Since the functional currency of the Company is NTD, the information on foreign exchange gain (loss) due to the difference between the transaction currency and the functional currency, please refer to note 6(t).

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

2) Interest rate analysis

The details of financial instruments exposed to interest rate risk were as follows:

	Carrying amount	
	December 31, 2025	December 31, 2024
Fixed-rate instruments:		
Financial assets	\$ 2,062,027	1,901,265
Financial liabilities	<u>(700,000)</u>	<u>(635,000)</u>
	<u>\$ 1,362,027</u>	<u>1,266,265</u>
Variable-rate instruments:		
Financial assets	\$ 355,968	399,766
Financial liabilities	<u>(1,700,000)</u>	<u>(1,250,000)</u>
	<u>\$ (1,344,032)</u>	<u>(850,234)</u>

The sensitivity analysis is based on the exposure to the interest rate risk of nonderivative financial instruments on the reporting date. Regarding liabilities with variable interest rates, the analysis is based on the assumption that the amount of liabilities outstanding at the reporting date was outstanding throughout the year. The rate of change is expressed as the interest rate increases or decreases 1 basis points when reporting to management internally, which also represents the Company management's assessment of the reasonably possible interest rate change.

If the interest rate had increased / decreased by 1 basis points, the Company's net income would have decreased / increased by \$3,360 thousand and \$2,126 thousand for the years ended December 31, 2025 and 2024, with all other variable factors remaining constant. This is mainly due to the Company's borrowing at variable rates and bank deposits in variable-rate bills.

(iv) Fair value of financial instruments

1) Fair value of financial instruments

The fair value of financial assets at fair value through profit or loss is measured on a recurring basis. The carrying amount and fair value of the Company's financial assets, including the information on fair value hierarchy were as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value, and lease liabilities, disclosure of fair value information is not required:

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

	December 31, 2024				
	Carrying amounts	Fair Value			
		Level 1	Level 2	Level 3	Total
Financial liabilities measured at amortized cost					
Long-term and short-term borrowings	\$ 1,885,000				
Notes and accounts payable (including related parties)	219,277				
Lease liabilities	9,154				
Other payables	<u>9,842</u>				
	<u>\$ 2,123,273</u>				

2) Valuation techniques for financial instruments measured at fair value

A financial instrument is regarded as being quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's-length basis. Whether transactions are taking place 'regularly' is a matter of judgment and depends on the facts and circumstances of the market for the instrument.

Quoted market prices may not be indicative of the fair value of an instrument if the activity in the market is infrequent, the market is not well-established, only small volumes are traded, or bid-ask spreads are very wide. Determining whether a market is active involves judgment.

(v) Financial risk management

(i) Structure of risk management

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect any changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The board of directors monitors the management to ensure compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The board of directors is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the board of directors.

(Continued)

NISHOKU TECHNOLOGY INC.
Notes to the Financial Statements

(ii) The Company have exposures to the following risks from its financial instruments:

- 1) Credit risk
- 2) Liquidity risk
- 3) Market risk

For more disclosures about the quantitative effects of these risks exposures and the Company's objectives, policies and processes for measuring and managing the above mentioned risks, please refer to note 6(u).

(w) Capital management

The Board's policy is to maintain a strong capital base in order to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consists of ordinary shares, paid-in capital, retained earnings, and other equity. As of December 31, 2025 and 2024, the Company's equity to asset ratios were 59% and 62%, respectively. There were no changes in the Company's approach to capital management as of December 31, 2025.

(x) Investing and financing activities not affecting current cash flow

The Company's investing and financing activities which did not affect the current cash flow in the years ended December 31, 2025 and 2024, were as follows:

(i) For acquisition of right-of-use assets, please refer to note 6(h).

(ii) Reconciliation of liabilities arising from financing activities were as follows:

	January 1, 2025	Cash flows	Changes in lease payments	Others	December 31, 2025
Short-term borrowings	\$ 1,085,000	315,000	-	-	1,400,000
